- B.S Computer Science
- Relevant Coursework: Data Structures, Database Systems, Operating Systems, Artificial Intelligence

Technical Skills & Certifications

- Certified In: Microsoft Office Suite (Word, Excel, and PowerPoint), Trello, Asana, and Python
- Languages: Python, Java, C, SQL
- Frameworks: Angular, React, LangChain, LangGraph, Node.js
- Cloud & Infrastructure: AWS (EC2, ECS, CloudFormation, S3), Docker, CI/CD Pipeline

EXPERIENCE

Vanguard – Charlotte, NC

Application Engineer Intern

Jan 2026 – July 2026

- Developed Java RESTful microservices for a multi-agent retirement planning platform, collaborating with a 10+ engineer Agile team
- Increased AI retrieval accuracy by 75%+ using semantic chunking with AWS Bedrock and Amazon ECS, improving response relevance
- Automated CI/CD pipelines, developed PAN/PII validation workflows, and worked with engineering teams to improve deployment reliability

Cisco Systems– Raleigh, NC

Software Engineer I Intern

Jun 2025 – Aug 2025

- Engineered an agentic AI platform using LangChain and Model Context Protocol to process 1M+ customer support records
- Developed Python and Java backend services through debugging and automated Quality Assurance testing
- Designed API interfaces and integrated backend services with cloud, embedded, and security engineering teams

BrandSymbol – Charlotte, NC

Business Development Intern

Aug 2024 – Dec 2024

- Conducted market research and maintained CRM data across 200+ client accounts to support business development
- Supported 10+ client pitches and project kickoffs through market research and client engagement
- Managed client outreach and sales progression alongside Account Executives across multiple engagements

Projects

VivahaPlan – Wedding Platform Planner

February 2026

- Built a full-stack wedding planning app using TypeScript, React, Node.js, and MongoDB with JWT, auth, and token-based guest sharing
- Engineered REST API endpoints and geolocation-based hotel search with real-time budget tracking across 75+ hours of development

AI-Integrated Business Research – DECA ICDC Finalist

April 2025

- Developed an AI-powered restaurant platform concept combining chatbot ordering and nutrition tools; ranked 8th internationally
- Projected 30-40% labor cost reduction through integrated AI automation; researched LLM and AI adoption trends across the food service industry

LEADERSHIP & RESEARCH

Collegiate DECA – UNC Charlotte

Founder, President

Feb 2024 – Present

- Founded UNCC's Collegiate DECA chapter, growing membership to 100+ students while leading operations and organizational growth
- Developed the organization's website, secured funding, and led teams with 70% placing Top 10 at the International DECA Competition

CRA UR2PhD Program - UNC Charlotte

Undergraduate Research Scholar

June 2026 – Aug 2026

- Developed role-based assessment logic, scoring algorithms, and automated feedback generation for higher education
- Built an AI readiness assessment platform using Python, RAG, and LLM APIs under Dr. Sri Yash Tadimalla

Honors and Awards

- Top 10 at International Collegiate DECA Competition Placed
- 1st in Internet of Things Arduino Challenge
- Top 10 at Technology Student Association State Competition
